Interlocking
Furniture

Step into the world of **quad Furniture** and experience stunning contemporary style, combined with innovative, unique design.

Constructed with high quality timbers from ethically managed and sustainable sources, **quad Furniture** creates an interlocking template for modern living spaces.

The Interlocking Range provides an inexpensive furnishing solution for the serviced housing sector, making them an ideal application in student, care and social housing and buy to let properties.

With no minimum order & the option of bespoke colours Quad furniture is also an attractive solution for the home.

Made in the UK, **quad Furniture** is a fully serviceable range..... individual component parts can be ordered & replaced independently, and you won't need a degree in engineering to assemble them..... precision engineered slotted joint technology, backed up by only a handful of screws, are the simple steps to a revolutionary concept in functional and stylish furnishing.

All **quad Furniture** can be easily dis-assembled enabling flat storage.

Quad kids Furniture is currently in development and utilises the very best of our slotted joint technology and minimal fixtures.

We are proud to present our interlocking furniture range, following continued success, now in its 4th year of production. We have successfully furnished clients through the region with our unique signature range.

The Interlocking furniture range consists of contemporary forms with understated detailing to create a relaxed style of bedroom and study furniture.

Each piece of furniture is designed and manufactured in the Nottingham ensuring parts can be replaced if needed rather than whole unit replacement.

Colour and finishes

Our standard white satin finish is our best selling. This range is also available in birch with a clear lacquered satin finish allowing the stunning striations of the wood markings to show. Additional colours are available on request when placing large orders.

Construction

Constructed from 18mm thick birch plywood, design to withstand the trials of heavy daily use. The design has been engineered so the interlocking joints create a strong durable construction unlike screwed pieces where the screw point forms a vulnerable joint. This unique patented Interlocking joint ensures a stable strong joint down the length of the piece.

Pricing

Our furniture is regularly bench marked against competitors and adjusted to accommodate fluctuating material costs to ensure we bring our clients the best value. Please call or email for a current price list.

Ordering
